TRAINEE OBJECTIVE

I am a graduating Information System student seeking an internship position to apply my knowledge and technical skills in a practical setting. I have a passion for front-end web development and mobile development.

PROJECTS

personal web portfolio I have experience creating visually appealing and user-friendly websites using VS code HTML, CSS, and JavaScript. My websites are responsive and have a modern and attractive design. Please click [HERE](#) to view my work.

mybookTicketApp I developed a mobile app using Flutter that provides a seamless user experience on any mobile device. The app allows users to book flights and hotels through an interactive interface. Please click [HERE](#) to view my work.

Myfurniture I designed and developed an e-commerce mobile app using Flutter. The app has a responsive and user-friendly interface. I created this app to learn more about state management, specifically providers. Please click [HERE](#) to view my work.
